notes

This paper, in its nature, is particularly sensitive to hygrometric variations. The optimum condition of storage environment and of use of the product are: temperature between 17 and 23°C (63-73°F); relative humidity 50% ± 5. The product is completely biodegradable and recyclable. To ensure the correct operation of the photocell detectors, there are white stripes on the edge of both sheet sides. Paper sensor at the input feed roller may need to be bypassed in order for the paper to be fed into the press.

The Company reserves the right to modify the technological features of the product in relation to market requirements.
