Bioprima Book is a high-quality paper, ideal for writing papers, corporate image and social communication, elegant monographs, de luxe publications, agendas and art reproductions.

applications

Can be used without problems with the main printing systems: letterpress, offset, blind embossing, hot foil stamping, thermography and screen printing. The macro-porous surface suggests the use of duct-fresh inks.

printing suggestions

Varnishing and plastic laminating must be assessed in advance. The varnish coated with an offset machine is almost fully absorbed and therefore does not improve gloss or protection. Screen-printing varnishing achieves better results, although it is often necessary to perform two shots to achieve a distinctly evident result. The lamination is not recommended. Good results with major processing operations such as: cutting, die-cutting, scoring, folding and glueing.
